

Legend with PRO

業務用
For Professional Use

Japan Disc Corporation (JDC) will launch new products of CD-R / DVD-R, which are best compatibility, low error rate, reliable and Japan quality. These products have been developed with cooperation of JDC and RITEK corporation, the worldwide leading optical disc manufacturer. RITEK is also in charge of the production. JDC will start to sell them worldwide via distributor from September 2018.

Main Features

- **Superior recording characteristics**

From material and sputtering process, fine-tune with the MID CDR/DVDR, successfully produce excellent recording characteristics which is same as Japan quality products.

- **Excellent compatibility**

Regarding the playability characteristics as well, RITEK produce the higher quality as other maker.

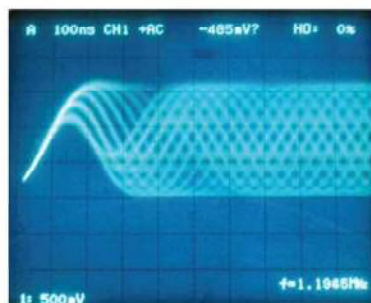

- **Low error rate**

A low error rate is realized in various systems, and it is best solution for duplication use.

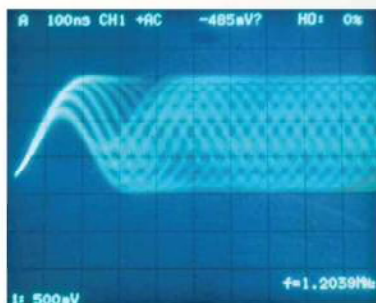

This product was commercialized based on MID License Agreement concluded between Taiyo Yuden Co., Ltd. and Japan Disc Corporation.
