

Production and worldwide distribution of
TOXKIT Microbiotests

Culture/maintenance free miniaturized bioassays
for routine toxicity screening of
chemicals, effluents, wastes, contaminated waters and soils

Algaltoxkit F

beads with micro-algae

No need for stock culturing
No need for maintenance of live
test organisms

*All kits include the test organisms in
"dormant or immobilized" form*

**SIMPLE
RAPID
ROBUST
SENSITIVE
REPRODUCIBLE
LOW COST**

Daphtoxkit F magna

*Daphnia egg and
hatched Daphnias*

An extensive battery of acute
and short chronic Toxkit
microbiotests is available with
representative test organisms
encompassing protozoa, micro-
algae, rotifers, crustaceans and
higher plants

Most Toxkit tests abide by
national/international standard
test procedures

Over 150.000 Toxkit tests
performed to date in 40 countries
worldwide

More than 400 papers with Toxkit
data listed on the website
