Zbridge W2W system

Zbridge BV is a company specialized in the rental and sales of the **Zbridge** W2W system. The company is providing project support to clients to ensure safe and efficient operations. The **Zbridge** is a Bureau Veritas certified W2W system. The patented system compensates the movement of the vessel for pitch, roll and heave to allow safe and efficient operation.

The **Zbridge** W2W system provides direct access with an elevator for personnel and cargo to the +18 meter level of the offshore structure. This improves safety, comfort and allows continuous access without undocking the system.

The **Zbridge** W2W system is offered as a fully operational rental package or can be procured. The **Zbridge** W2W System is developed by **Zbridge** in cooperation with our hydraulic and controls technology partner.

Opening New Operational Windows

Operating window:

<i>Windspeed :</i>	operational	18 m / sec
	stowed (sea fastened)	44 m / sec
